

Department Portal – Admin User Tutorial

Objective

This tutorial is designed to guide Admin users through the complete functionality of the Department of CSE's academic portal. As an Admin, you play a key role in managing the portal's operations, including user onboarding, scholar and publication data maintenance, approval workflows, and report generation. This guide explains each section of the portal in detail, including screenshots and descriptions of key actions.

1. Home Page

Once the Admin logs in, they are welcomed with a message ('Welcome Admin') and shown a profile card that displays the admin's name, registered email, and assigned role. This simple interface confirms the user's identity and allows quick orientation to the session.

2. Sidebar Navigation

The sidebar located on the left provides access to all major modules of the portal. These sections are accessible at all times and enable quick switching between functionalities. The available sections are:

- - Home: Redirects to your welcome dashboard
- - Scholars: View and manage research scholars
- - Publications: Review and track faculty publications
- - OD History: Approve or reject On Duty and SCL requests
- - View CR: View submitted course reports from faculty

- - Consolidation Report: Generate a summary of CR and OD data
- - AddUser: Add new users such as faculty or other admins
- - Tutorial: View the user manual or help guide
- - Logout: Exit the portal securely

3. Scholars Page

This section provides a tabulated view of all scholars affiliated with the department. It is divided into two categories — Current Working Scholars and Completed Scholars. Each scholar entry contains detailed fields like name, registration number, email, phone, area of research, semester, program, date of joining, date of completion, and supervisor.

The admin can filter scholars by name, search specific entries, sort data alphabetically or chronologically, show/hide columns, and export the list to a CSV file for record-keeping or external processing.

The screenshot displays the 'Scholars List' interface. At the top, there are filters: 'Filter by Name' (a dropdown menu), a 'Search by name...' input field, 'Sort by Name' (a dropdown menu), 'Ascending' (a dropdown menu), and a 'Clear Filters' button. Below these are two buttons: 'Export Data (CSV)' and 'Columns'. The page is divided into two sections: 'Current Working Scholars' and 'Completed Scholars'. Each section has a table with the following columns: Name, Registration Number, Email, Phone, Area of Research, Semester, Program, Date of Joining, Date of Completion, and Supervisor. Both tables are currently empty, with a message 'No current working scholars found.' and 'No completed scholars found.' respectively.

4. Publications Page

This page displays a comprehensive list of all research publications submitted by faculty members. Each publication includes the title, author's name, publication date, publisher or journal, and DOI link if available. Admins can use the filter to narrow results by title or search keywords directly.

5. OD Requests Page

This module is critical for managing faculty leave requests. Admins can view all On Duty (OD) and Special Casual Leave (SCL) requests. Requests are shown in two categories: pending and approved. Each entry includes the faculty name, event name, type of request, and its current status.

Clicking on the 'View' button opens a detailed modal that includes additional metadata like start/end date and time, event type, and any attached supporting documents. From this popup, Admins can directly approve or reject the request.

Faculty3'S Request

Request Type: OD

Event Type: Industrial Visit

Start Date: 6/28/2025

End Date: 6/29/2025

Start Time: 08:40 AM

End Time: 08:40 PM

Status: Pending

Supporting Documents:

- Document 1

6. CR Reports Page

Course Reports (CRs) submitted by faculty are managed here. The Admin can filter reports by academic year, semester period (Odd/Even), status (pending, submitted, approved), or search by faculty name. Each row in the table shows the faculty member's name, department, report year, semester period, submission status, and action buttons if applicable.

All CR Reports

Search by faculty name

All Years

All Periods

All Statuses

Faculty Name	Department	Year	Period	Status	Actions
No reports found.					

7. Add User Page

The AddUser section allows the admin to create new user accounts for faculty, scholars, or additional admins. Required fields include full name, email, password, and role selection from a dropdown. Once all details are filled, clicking 'Next' completes the registration.

8. Consolidation Report

This section helps generate department-level summary reports by combining OD request history and CR submission data. It is particularly useful for internal reviews, documentation, audits, or sharing with university authorities. The report format typically includes academic years, status distribution, and faculty participation metrics.

Summary of Admin Privileges

- - Register and manage user accounts across the department
- - Monitor and update scholar records and publication logs
- - Approve OD/SCL requests and maintain attendance records
- - Track course activity through submitted CRs
- - Generate annual and consolidated academic reports
