

Department Portal –HOD User Tutorial

This tutorial is designed to assist Heads of Department (HODs) in effectively using the academic portal for departmental administration. The portal centralizes essential academic workflows such as scholar tracking, publication management, OD/SCL request processing, and course report monitoring.

Through this guide, HODs will gain a clear understanding of how to navigate the interface, utilize available filters and actions, and oversee key academic operations efficiently and accurately. This ensures transparency, accountability, and ease of management within the department's academic ecosystem.

1. Home Page

After logging in, the Head of the Department (HOD) is greeted with a welcome message displaying their name, such as 'Welcome HOD1'. Below this greeting, a profile card shows the user's Name, Email, and Role (e.g., 'hod'). This confirms the active session and the privileges of the user.

2. Sidebar Navigation

The left sidebar offers quick access to different modules of the portal. The available navigation items are:

- - Home: Returns to the dashboard
- - Scholars: Displays the list of current and completed scholars
- - Publications: Opens the list of departmental publications

- - OD History: Lists all On Duty and SCL requests
- - View CR: Displays submitted Course Reports
- - Logout: Ends the current session securely

3. Scholars Page

This section shows a categorized list of scholars under two tabs: 'Current Working Scholars' and 'Completed Scholars'. Each entry includes details such as Name, Registration Number, Email, Phone, Area of Research, Semester, Program, Date of Joining, Date of Completion, Supervisor, and an Actions column.

The screenshot displays the 'Scholars List' interface. At the top, there are filter controls: 'Filter by Name' (a dropdown), a search input field with the placeholder 'Search by name...', 'Sort by Name' (a dropdown), an order dropdown set to 'Ascending', and a 'Clear Filters' button. Below these are two buttons: 'Export Data (CSV)' and 'Columns'. The interface is divided into two main sections. The first section, 'Current Working Scholars', features a table with 11 columns: Name, Registration Number, Email, Phone, Area of Research, Semester, Program, Date of Joining, Date of Completion, Supervisor, and Actions. The table body is empty, showing the message 'No current working scholars found.' The second section, 'Completed Scholars', also features a table with the same 11 columns. Its body is also empty, showing the message 'No completed scholars found.'

Users can filter, search, and sort scholars using options like filter by name, sort by various parameters, ascending/descending order toggles, column visibility controls, and export to CSV functionality. If no records are found, the system displays a message indicating the absence of data.

4. Publications Page

This page allows HODs to view departmental publications. The list includes the Title, Author, Publication Date, Journal/Publisher, and DOI. A search bar and filter dropdown help refine the list. If no results are found, a relevant message is shown.

5. OD History Page

This page displays both pending and approved OD (On Duty) and SCL (Special Casual Leave) requests from faculty members. Each row includes the Faculty Name, Type, Event Name, Status, and an action button labeled 'View'. Clicking 'View' opens a detailed popup with the request type, event details, time and date, status, and any supporting documents.

Within this modal, the HOD can approve or reject the request using the respective buttons at the bottom.

6. CR Reports Page

This section allows the HOD to monitor Course Reports (CR) submitted by faculty. Filters are provided to search by faculty name, year, academic period, and report status. The report table includes Faculty Name, Department, Year, Period, Status, and Action. If there are no submissions, the table will indicate that no reports were found.

Summary of Key Functionalities

- - Approve or reject OD/SCL requests via the dashboard
- - Filter, search, and export scholar and publication data
- - Monitor Course Report submissions and statuses
- - Ensure data is up-to-date for scholars and publications
